Title: Finite-change automata

Author von Braumuhl, B.; Verbeek, R.

Author Affiliation: Inst. fur Informatik, Univ. Bonn, Bonn, West Germany

Conference Title: Theoretical Computer Science 4th GI Conference p. 91-100

Editor(s): Weihrauch, K.

Publisher: Springer-Verlag, Berlin, West Germany

Publication Date: 1979 Country of Publication: West Germany vii+324 pp.

ISBN: 3 540 09118 1

Conference Date: 26-28 March 1979 Conference Location: Aachen, West Germany

Language: English

Subfile: C

Abstract: ...medium with properties between space and time: the finite-change tape (FC-tape), a Turing tape, on which every cell can be changed only a bounded number of times.

Abstract: ...the other, in both directions. Pressure and nociceptive stimulation evoked depolarizing and hyperpolarizing responses in touch cells, mediated by interneurons. The relative expression of these responses depended on the stimulus duration. One or two pressure cell spikes produced, predominantly, a depolarization of the touch cells, and increasing number of spikes evoked a hyperpolarization. Nociceptive cells produced primarily the hyperpolarization of touch cells at any stimulus duration. When touch cells were induced to fire by injection of positive current into the soma, stimulation of pressure cells inhibited touch cell activity. However, when touch cells were induced to fire by peripheral stimulation, pressure cell activation failed to inhibit touch cell...
